

ENROPLUS

**HIGH PERFORMANCE STORABLE
"COLD PATCH" MIX**

S&S Supply
YOUR SUPPLY SPECIALISTS

ENROPLUS is a storable, high performance cold bituminous mix (cold patch) used for potholes and/or specific repairs.

For quick and long-lasting repairing

ENROPLUS is composed of a mix of high-quality aggregates, bitumen modified with polymers and additives. Thanks to carefully selected components and a laboratory validation of expected performance, ENROPLUS is a high performance product that distinguishes itself by:

- an excellent workability whatever weather conditions. - which facilitates manual operations even at low temperatures.
- the use of bitumen modified with polymers ensures an excellent adhesion to pothole sidewalls even at low temperatures, an increase in cohesion properties and a reduction of chipping, bleeding and ravelling risks.

ENROPLUS is a registered trademark.
ENROPLUS is a product approved by the
Quebec Department of Transportation.

ENROPLUS is available in 22,7 kgs and 30 kgs bag or in bulk, as required.

ENROPLUS is used on highways and main roads by the Quebec Department of Transportation and by several towns and Municipalities.

ENROPLUS is manufactured in a strictly controlled environment under specific procedures (Certification ISO 9001: 2000).
